Source-separated recyclable material that will significantly distort a certified C&D sorting facility's recycling percentage

The following recyclable materials, when delivered in source separated fashion, will significantly distort a recycling facility's recycling percentage performance calculation, calculated pursuant to Ordinance No. 19, section 3.01.120 (B):

1. Wood wastes, all types
2. Drywall, also known as gypsum wallboard

These materials will be excluded from the material recycled and the material accepted when making the performance calculation for a SWA - Certified C&D Sorting Facility.

Administrative Rule 2009-02 was received and filed by the Sacramento Regional Solid Waste Authority Board at the May 18, 2009 meeting.
